ABOUT ME

I am a software engineer with a special love for flutter. I absolutely love to develop mobile apps (usually try to include them in every project I touch) and backend development. I have a particular passion in simplifying everything that I can and easily motivate myself to develop some product which would achieve my objective. My goal is that, in the future, I can look back and really believe I have accomplished something meaningfull and still had fun doing it.

EXPERIENCE

BEST Aveiro

📅 11 2019 – 06 2021 📍 Aveiro, Portugal

- Main organiser of the Local Event on Education 2020 which was intended to promote communication between the university and students to improve Quality of Life
- IT Responsible at EBEC Aveiro 2020. Responsible for website development and full implementation of the Android mobile App

.NET Core and Flutter Developer | Universidade de Aveiro

📅 02 2021 – 12 2021 📍 Aveiro, Portugal

- Development of a manager of user permissions for room reservation using .NET Core. This application is still in development.
- Development of a mobile app which allowed members of the university to book classrooms.

EDUCATION
